

Indore Municipal Corporation (IMC)

PWD (Public Works Department) & Revenue Department — Chatbot FAQ Knowledge Base

Prepared for chatbot/FAQ ingestion • Verified against official IMC sources available on 18 August 2026

Purpose: This document is designed as a citizen-facing knowledge base. Answers are intentionally conservative: the chatbot should not invent current fees, deadlines, completion dates, contractor details, officer assignments, or case status when those values are not retrieved from a current official source.

Primary official source: Indore Municipal Corporation (IMC), imcindore.mp.gov.in. IMC currently lists Property Tax, Water Charges, Solid Waste Management, Bill Tracking, Grievances, CRM Services, Tenders and other citizen services.

1. Department Scope & Routing

Citizen issue / intent	Route to
Damaged municipal road / pothole / road civil work	PWD / Public Works
Road construction, reconstruction, CC/BT road work	PWD / Public Works
Public civil infrastructure issue	PWD / Public Works, subject to jurisdiction
Property tax / property tax dues / tax payment	Revenue
Water tax / water-tax collection / water charges payment	Revenue
Property survey / property data / property record information	Revenue
Drainage/sewer blockage or sewerage service	Drainage & Sewerage (not automatically PWD)
Water supply/no water/new water-supply service	Water Supply (not automatically Revenue)
Street-light/electrical issue	Electrical & Mechanical
Garbage/solid-waste service issue	Swachh Bharat Mission / Solid Waste Management

2. PWD / Public Works Department — FAQ

Verified scope: IMC's current Additional Commissioner page allocates the Public Works Department to the Public Works portfolio. IMC's current website also publishes tenders/notices and municipal infrastructure information. The M.P. Municipal Corporation Act provides the statutory framework for municipal functions including public streets and related infrastructure.

PWD-001. What does the PWD/Public Works Department of IMC do?

PWD is the IMC department responsible for municipal public-works functions. For chatbot routing, this includes questions and complaints concerning municipal road and other civil/public infrastructure works under IMC jurisdiction.

PWD-002. Where should I complain about a damaged road?

A damaged municipal road can be treated as a Public Works issue. The chatbot should collect the exact location, nearest landmark, ward/zone if known, a description of the damage, and a photograph if the complaint channel supports attachments. The complaint should then be registered through the applicable IMC grievance channel.

PWD-003. How do I report a pothole?

Report the pothole through the applicable IMC grievance/complaint channel and provide the precise location and nearest landmark. If available, attach a clear photograph.

PWD-004. My road is broken. Which department should I contact?

If the issue concerns a municipal road or road civil work, route it to PWD/Public Works. If the issue is actually caused by drainage, sewerage, water-supply or another utility, the chatbot should route it to the relevant specialist department instead.

PWD-005. Who handles road construction in IMC?

Municipal road construction and related public civil works fall within the Public Works portfolio, subject to the particular project and IMC's administrative allocation.

PWD-006. Who handles road repair?

Road repair/maintenance complaints concerning municipal public works should be routed to PWD/Public Works, subject to jurisdiction and the specific road/project.

PWD-007. Can I complain about incomplete road construction?

Yes. Treat an incomplete municipal road-work complaint as a Public Works issue. Collect the location, project/road name if known, description of the incomplete work, and supporting photographs if available.

PWD-008. How can I complain about poor-quality road work?

The chatbot can route a complaint about suspected poor-quality municipal road work to the appropriate IMC grievance/Public Works channel. It should not declare that a contractor is at fault; it should record the citizen's observation and location for official inspection.

PWD-009. When will my road be repaired?

The chatbot should not promise a repair date unless a current official IMC work schedule/status source provides one. It should instead provide the complaint-registration/status route.

PWD-010. When will road construction start or finish?

Only provide a start or completion date when it is retrieved from a current official IMC notice, tender, work order, project-status record, or other verified municipal source. Otherwise say that the current date is not available in the chatbot's verified data.

PWD-011. Who is the contractor for a road project?

Provide the contractor only when the current official tender/work-order record identifies the contractor. Do not infer or invent a contractor from a news article or old project.

PWD-012. How can I check an IMC road tender?

Use the official IMC tender information and/or the Madhya Pradesh e-procurement system when a tender number, project or department is available. The chatbot should use current tender data for status, dates and bidder/contractor information.

PWD-013. What details should I provide for a road complaint?

At minimum: exact location, nearest landmark, ward/zone if known, type of road problem, description/severity, and a photograph if supported. A project/tender/work-order number is useful when available.

PWD-014. Does PWD handle every drain or sewer complaint?

No. IMC separately allocates Drainage and Sewerage and Water Supply functions. The chatbot should first identify whether the complaint is a road/civil-work issue or a drainage/sewerage service issue.

PWD-015. Does PWD handle water-supply complaints?

No. IMC separately allocates Water Supply. A complaint about not receiving water, water-supply pressure, a new water connection, or a water-supply service should not automatically be routed to PWD.

PWD-016. Can I track my road complaint?

IMC provides grievance/CRM and other citizen-service channels. If the chatbot is connected to the relevant complaint system, it should retrieve the live status using the complaint/reference number. Otherwise it should direct the citizen to the official IMC grievance/status service.

PWD-017. What is the IMC 311 app?

IMC's official website provides access to the 311 app as a citizen-service channel. The chatbot should use the current official IMC link/app information when directing citizens to register or track complaints.

PWD-018. Can I upload a photo with a road complaint?

If the current complaint channel supports attachments, a citizen can provide a photograph. The chatbot should not promise attachment functionality unless it is enabled in the connected grievance system.

PWD-019. Is every road in Indore maintained by IMC?

Not necessarily. A road may fall under IMC or another authority depending on jurisdiction. The chatbot should avoid claiming IMC responsibility without verified jurisdiction/project information.

PWD-020. What if my road has been dug up and not restored?

Collect the location, utility/project information if known, date/period of excavation if known, and photographs. Route the complaint according to the verified responsible department/project rather than automatically assigning it to PWD.

3. Revenue Department — FAQ

Verified current scope: IMC's current Additional Commissioner page explicitly assigns the Revenue Department as a whole, including Property Tax, Water Tax, Water Tax Collection, Survey of Property and Preparation of Data. IMC's website provides Property Tax and Water Charges as online services.

REV-001. What does the Revenue Department of IMC do?

IMC's current administrative allocation places the Revenue Department under the Revenue portfolio, including Property Tax, Water Tax, Water Tax Collection, Survey of Property and Preparation of Property Data.

REV-002. What is property tax?

Property tax is a municipal tax associated with buildings/land within the municipal corporation area under the applicable Madhya Pradesh municipal law and rules. IMC provides a Property Tax citizen service for property-tax related transactions.

REV-003. Who has to pay property tax?

Property tax applies according to the applicable municipal law, rules, assessment and the property's circumstances. The chatbot should not make a property-specific liability determination without the current property record and applicable rules.

REV-004. How is property tax calculated?

IMC's published rate notification states that taxable property value/annual letting value is calculated using prescribed rates according to rate zone and construction/property category. The final property-tax demand depends on the applicable current municipal assessment and tax rules.

REV-005. What is taxable property value?

Taxable property value is the value used for municipal property-tax assessment under the applicable rules. IMC's published rate notice describes taxable property value as annual letting value and provides prescribed rates by rate zone and construction category.

REV-006. What is annual letting value?

In IMC's property-tax notice, taxable property value is described as annual letting value. The chatbot should explain it in the context of the municipal property-tax assessment system and avoid using unrelated market-property valuations as a substitute.

REV-007. What is a property-tax rate zone?

A rate zone is a municipal classification used in the published IMC rate schedule. The applicable rate can vary by rate zone and by property/construction category.

REV-008. How do I know which rate zone my property is in?

The citizen should use the current IMC property record/rate-zone information. IMC's published notification identifies rate-zone changes for specified colonies and wards. The chatbot should not guess a rate zone from a locality name unless it has the current verified mapping.

REV-009. Can I pay property tax online?

Yes. IMC currently lists Property Tax as an online service on its official website. Use the current official IMC Property Tax service for the actual payment workflow.

REV-010. How can I check my property-tax dues?

Use the official IMC Property Tax service and the property's relevant identification details. If the chatbot is connected to IMC's tax system, it should retrieve the current demand rather than estimate it.

REV-011. How can I get my property-tax receipt?

Use the official IMC Property Tax/payment service. If connected to the payment system, the chatbot can retrieve or guide the citizen to the receipt; otherwise it should direct the citizen to the official service.

REV-012. My property-tax payment was deducted but my account is not updated. What should I do?

Treat this as a payment-status issue. Ask for the transaction/reference number, property ID if available, payment date, amount and payment method. Do not claim that the payment has failed or succeeded without a verified transaction status.

REV-013. Why has my property tax increased?

Possible reasons can include changes in assessed property information, applicable rate-zone/category data, current municipal assessment rules, or other lawful charges. The chatbot should inspect the current property record/demand before giving a property-specific explanation.

REV-014. My owner's name is wrong in the property record. What should I do?

Treat it as a property-record/data-correction request. Ask for the property identification details and direct the citizen to the current IMC procedure for correction. Do not invent a document list or processing time.

REV-015. My property address is wrong. What should I do?

Treat it as a property-data correction request. Collect the property identification details and direct the citizen to the current IMC property-record correction process.

REV-016. My property area is incorrect. What should I do?

Treat it as a property-data/assessment correction request. The chatbot should collect the property identification details and route the request to the current IMC property-tax/property-data correction mechanism.

REV-017. My property is not appearing online. What should I do?

Treat it as a property-data issue. Ask for available property identification/location details and direct the citizen to the official IMC property service or the relevant municipal office/process.

REV-018. What is property survey?

Property survey is part of the Revenue Department's current administrative portfolio. It relates to collecting/verifying property information used for municipal records and related assessment/data purposes.

REV-019. How can I get my property surveyed?

Property survey is handled within the Revenue portfolio. The chatbot should provide the current IMC procedure when available and should not invent an appointment process or timeline.

REV-020. How can I correct property data?

Treat this as a Revenue/property-record issue. Collect the property identification details and specify which field is incorrect. Then route the citizen through the current IMC correction process.

REV-021. I purchased a property. How do I update municipal records?

Treat this as a property-record/assessment matter. The chatbot should provide the current IMC process and required documents only from a verified current official source.

REV-022. I inherited a property. How do I update municipal records?

Treat this as a property-record/assessment matter. The chatbot should provide the current IMC process and required documents only from a verified current official source.

REV-023. What is water tax?

Water tax is a municipal water-related tax provided for under the applicable municipal framework. IMC's current administrative allocation places Water Tax and Water Tax Collection within the Revenue portfolio.

REV-024. Are water tax and water supply the same thing?

No. IMC separately allocates Water Tax/Water Tax Collection to Revenue and Water Supply to the Water Supply Department. A payment/tax question should be routed differently from a water-supply service complaint.

REV-025. Can I pay water charges online?

IMC currently lists Water Charges as an online service. Use the official IMC Water Charges service for the current payment workflow.

REV-026. How can I check my water bill/charges?

Use the official IMC Water Charges service and the relevant consumer/account details. If connected to the live billing system, the chatbot should retrieve the current bill rather than estimate it.

REV-027. My water payment was deducted but is not reflected. What should I do?

Treat it as a payment-status issue. Ask for the transaction/reference number, account/consumer details if available, payment date and amount. Do not declare the payment successful or failed without verified transaction information.

REV-028. Why is my water bill/charge high?

The chatbot should not guess. It should retrieve the current bill/account information and, where available, explain the billed components using official IMC data. If the citizen disputes the bill, route it through the relevant complaint/correction process.

REV-029. My water account details are incorrect. What should I do?

Treat it as a water-account/data correction issue and direct the citizen to the current IMC Water Charges process or the relevant municipal office.

REV-030. What is the Solid Waste Management / door-to-door garbage charge?

IMC's published Revenue Department rate notice includes prescribed Solid Waste Management (Door-to-Door Garbage) charges by rate zone and residential/commercial category. The applicable current amount should be taken from the latest valid IMC notification/account record.

REV-031. Why is a garbage/SBM charge appearing with my municipal property charges?

IMC's published rate notice provides a Solid Waste Management/Door-to-Door Garbage charge schedule. The chatbot should explain the charge using the latest applicable notification and the citizen's current municipal account.

REV-032. What are the current property-tax rates?

IMC has published a rate notification for taxable property value/annual letting value and Solid Waste Management charges. Rates can depend on rate zone and property/construction category. The chatbot should use the latest valid official IMC notification rather than rely on an old hard-coded value.

REV-033. Can the chatbot tell me exactly how much property tax I owe?

Only if it is connected to a current verified IMC tax/account system or is given the current official property-tax demand. It should not calculate a citizen's final payable amount from generic rates alone.

REV-034. Can the chatbot tell me the penalty/late fee?

Only when the current official IMC account/rules provide the applicable amount. Do not invent a penalty or assume a rate.

REV-035. How can I complain about an incorrect property-tax demand?

Collect the property ID/relevant account details, explain what appears incorrect, and route the issue through the official IMC grievance/property-tax correction process. The chatbot should not decide the dispute itself.

REV-036. How can I contact the Revenue Department?

Use the current official IMC contact/department information. Officer assignments and phone numbers can change, so the chatbot should retrieve current contact data from the official IMC source rather than hard-code old numbers.

4. Current Official Data — Store Separately From FAQs

These values are useful for routing and source metadata, but should be treated as dynamic data because officers, rates and service pages can change.

Item	Verified value/source
IMC main website	https://imcindore.mp.gov.in/
IMC main contact shown on official site	0731-4071717
IMC helplines shown on official site	104; 1075; 0755-2704201; 2441419; 4926892
PWD Additional Commissioner (current page)	Mr. Abhay Rajangaonkar — Additional Commissioner
Revenue Additional Commissioner (current page)	Mr. Akash Singh — Additional Commissioner
MIC member — Public Works & Parks	Shri Rajendra Rathore
MIC member — Revenue	Shri Niranjan Singh Chouhan
Current IMC online services relevant here	Property Tax; Water Charges; Grievances; CRM Services; Bill Tracking
Published rate notice	IMC 2024-25 Revised Rate List for Property Tax and SBM Fee; verify latest notice before using rates

5. Verified Property-Tax / SBM Rate Reference

IMC's published 2024-25 rate notice states that taxable property value/annual letting value is determined using prescribed rates per square foot according to rate zone and construction/property category. The notice also lists monthly Solid Waste Management (Door-to-Door Garbage) charges by rate zone and residential/commercial category. These values are included here as a reference only; the chatbot must verify that a newer notification has not replaced them before presenting them as current.

Category	Zone 1 R	Zone 1 NR	Zone 2 R	Zone 2 NR	Zone 3 R	Zone 3 NR	Zone 4 R	Zone 4 NR	Zone 5 R	Zone 5 NR
RCC/RBC/stone-roof permanent building	30	64	26	59	21	53	18	48	16	43
Cement/iron sheet/tile-roof permanent building	20	53	18	46	16	43	14	37	12	32
Other partly permanent/kutchha building	16	43	14	37	12	32	10	27	8	21
Land	18	32	15	27	12	21	9	16	6	11

Important: These rates come from the IMC-published 2024-25 notice and should not be treated as a guaranteed 2026-27 rate without checking the latest IMC notification.

Rate zone	Residential / month	Commercial / month
1	₹150	₹180
2	₹130	₹160
3	₹100	₹140
4	₹90	₹120
5	₹60	₹100

6. Chatbot Safety / Accuracy Rules

- Never invent a fee, tax amount, penalty, deadline, processing time, officer, contractor, project status or completion date.
- Use current IMC data for citizen-specific values such as property-tax demand, water charges, payment status and complaint status.
- Treat published rate notices as versioned data with effective period and source document.

- If a citizen asks a property-specific question, ask for the property/account identifier required by the connected official service.
- Do not confuse Revenue's Water Tax/Water Tax Collection with the Water Supply Department.
- Do not route every drainage complaint to PWD; IMC separately lists Drainage and Sewerage.
- Do not assume every road is under IMC jurisdiction; verify the responsible authority when possible.
- When current information is unavailable, say so clearly and provide the official IMC route rather than guessing.
- Officer names and phone numbers are dynamic. Keep them in a separately updateable contact table.
- For complaints, collect location + issue + useful identifying details before routing.
